

“Indiana’s New Energy Code” Educational Seminar

July 22, 2010

The Indiana Concrete Masonry Association is hosting a three hour educational program to discuss the new 2010 Indiana Energy Conservation Code and how Masonry can meet the prescriptive requirements. The program will be held at the Indianapolis Marriott East, July 22, 2010. This educational program is open to architects, mechanical engineers, structural engineers, owners and government entities.

Learn About Masonry’s Ability to Meet and Exceed the 2010 Indiana Energy Conservation Code!

“Masonry continues to meet and exceed any and all Energy Conservation and Energy Efficiency Codes and Standards cost-effectively.”

Whether you are looking at multi-wythe, single-wythe, structurally composite or non-composite, hybrid, combination form (masonry veneer with stud back-up or Coverings with masonry back-up), single-story or multi-story, high wind, high snow-load, deep frost line, and/or high seismic, Energy Conservation minimum Code or Standard to minimum Point of Diminishing Return to Return on Investment, to maximum LEED® Points (19 + 1 in EA Credit contributions), R-value or U-factor, high noise and sound abatement, particular lighting requirements, specific air infiltration / exfiltration requirements, moisture control and weather protection, pest control / habitats, specific engineering and/or software and/or commissioning requirements, ...*masonry continues to do it all!*

There never has been a break in masonry performance!
